Work Experience

● Nupat Technologies   Aug 2022 - Dec 2023
                                                          Akoka, Lagos state

Software Engineer & Product Manager

- Led the design and development team in creating Hucksters, an intuitive e-commerce platform, ensuring a seamless user experience and robust functionality.
- Created accessible, responsive, and functional user interfaces to allow visitors on any device to have the same perfect user experience
- Implemented web development best practices to enhance user experience and optimize database performance, ensuring efficiency, scalability, and seamless functionality.

● Endevops   Dec 2023 - Jan 2025
                                               Ojota, Lagos state

Lead Software Engineer

- Collaborating with blockchain and AI engineers to develop an innovative AI-powered blockchain application designed for securely storing and managing Real-World Assets (RWA) on the blockchain.
- Worked as the sole developer and designer on Pinoy, a user-centric delivery application, handling both the technical development and UX/UI design to ensure a seamless and intuitive user experience.

● Euro 65 Motors   Aug 2022 - Dec 2023
                                                     Akoka, Lagos state

Lead Software Engineer & Product Manager

- Developed an Inventory Management System to help the organization track incoming and sold cars, enhancing security, safety, and transparency in operations.
- Designed an intuitive user interface to ensure that staff with non-technical backgrounds could navigate and use the application effortlessly, minimizing the need for extensive training.
- Developed an intuitive dashboard for executives to monitor sales and track progress from anywhere in the world. Implemented user-friendly UI features such as filtering, quick search, and streamlined navigation to enhance usability and efficiency.

Skills

- **Frontend Development:** React, NextJS, React Native, Flutter – Building reusable components and real-time features.
- **Backend Development:** Node.js, Django, Supabase – Developing RESTful APIs, real-time databases, and user authentication.
- **UI/UX Design:** Figma, Adobe XD – Focusing on user-centered, responsive designs.
- **Database Management:** PostgreSQL, MongoDB, SQL – Managing schema design and data storage
